

Resource-specific Previews

In many cases a Release Creator wishes to communicate previews for some (or all) of the resources contained in a release. To effect this, two things need to be done:

Firstly, for each sound recording there have to be (at least) two binaries. Details on how this can be done can be found [here](#).

Secondly, a set of adapted Deals needs to be communicated: one for the "normal" exploitation and one for the previews.

To explain this a two-track album (referenced as $R1$) is assumed. The two sound recordings are referenced as $A1$ and $A2$ and the four binaries are $T1$ and $T1P$ (for $A1$), and $T2$ and $T2P$ (for $A2$).

Example for Resource-specific Previews (ERN-3)

```
<DealList>
  <ReleaseDeal>
    <!-- This is the deal for the 'normal' exploitation (here:
download) -->
    <DealReleaseReference>R1</DealReleaseReference>
    <Deal>
      <DealTerms>
        <Usage>
          <UseType>Download</UseType>
        </Usage>
        <TerritoryCode>FO</TerritoryCode>
        <ValidityPeriod>
          <StartDate>2016-01-01</StartDate>
        </ValidityPeriod>
      </DealTerms>
      <DealTechnicalResourceDetailsReferenceList>

<DealTechnicalResourceDetailsReference>T1</DealTechnicalResourceDetailsRef
erence>

<DealTechnicalResourceDetailsReference>T2</DealTechnicalResourceDetailsRef
erence>
      </DealTechnicalResourceDetailsReferenceList>
    </Deal>
  </ReleaseDeal>
  <ReleaseDeal>
    <!-- This is the deal for the preview (here: stream) -->
    <DealReleaseReference>R1</DealReleaseReference>
    <Deal>
      <DealTerms>
        <Usage>
          <UseType>Stream</UseType>
        </Usage>
        <TerritoryCode>FO</TerritoryCode>
        <ValidityPeriod>
          <EndDate>2016-01-01</EndDate>
        </ValidityPeriod>
      </DealTerms>
      <DealTechnicalResourceDetailsReferenceList>

<DealTechnicalResourceDetailsReference>T1P</DealTechnicalResourceDetailsRe
ference>

<DealTechnicalResourceDetailsReference>T2P</DealTechnicalResourceDetailsRe
ference>
      </DealTechnicalResourceDetailsReferenceList>
    </Deal>
  </ReleaseDeal>
</DealList>
```

Example for Resource-specific Previews (ERN-4)

```
<DealList>
  <ReleaseDeal>
    <!-- This is the deal for the 'normal' exploitation (here:
download) -->
    <DealReleaseReference>R1</DealReleaseReference>
    <Deal>
      <DealTerms>
        <TerritoryCode>FO</TerritoryCode>
        <ValidityPeriod>
          <StartDate>2016-01-01</StartDate>
        </ValidityPeriod>
        <UseType>Download</UseType>
      </DealTerms>
      <DealTechnicalResourceDetailsReferenceList>

<DealTechnicalResourceDetailsReference>T1</DealTechnicalResourceDetailsRef
erence>

<DealTechnicalResourceDetailsReference>T2</DealTechnicalResourceDetailsRef
erence>
      </DealTechnicalResourceDetailsReferenceList>
    </Deal>
  </ReleaseDeal>
  <ReleaseDeal>
    <!-- This is the deal for the preview (here: stream) -->
    <DealReleaseReference>R1</DealReleaseReference>
    <Deal>
      <DealTerms>
        <TerritoryCode>FO</TerritoryCode>
        <ValidityPeriod>
          <EndDate>2016-01-01</EndDate>
        </ValidityPeriod>
        <UseType>Stream</UseType>
      </DealTerms>
      <DealTechnicalResourceDetailsReferenceList>

<DealTechnicalResourceDetailsReference>T1P</DealTechnicalResourceDetailsRe
ference>

<DealTechnicalResourceDetailsReference>T2P</DealTechnicalResourceDetailsRe
ference>
      </DealTechnicalResourceDetailsReferenceList>
    </Deal>
  </ReleaseDeal>
</DealList>
```
