

Territorial RightsController Information

The `RightsController` composite can communicate information about who owns what right in a sound recording. It sits, in ERN-3 and MLC versions 1.1 through 1.4 in the `SoundRecordingDetailsByTerritory` composite. The `RightsController` composite has one subelement to define the territorial scope of the rights that are controlled. This means that there are two territory codes that govern this composite. These two have, however, different meanings:

- The territory code **above** the `RightsController` composite (i.e. the one on `SoundRecordingDetailsByTerritory` level) defines for which country the `RightsController` composite should be provided. It is mainly to enable the communication of different names/spellings of the `RightsControllers`. This feature is no longer available in ERN-4.
- The territory code **inside** the `RightsController` composite defines for which country the named `RightsController` owns the rights.

Assuming a company "Left Right" (spelled in Japan) owns 10% in France and 50% in Japan. This information can be provided as follows:

- `SoundRecordingDetailsByTerritory`
 - Country: France
 - `RightsController`
 - Name: Left Right
 - Country: FR
 - Percentage: 10%
 - `RightsController`
 - Name: Left Right
 - Country: JP
 - Percentage: 50%
- `SoundRecordingDetailsByTerritory`
 - Country: Japan
 - `RightsController`
 - Name:
 - Country: FR
 - Percentage: 10%
 - `RightsController`
 - Name:
 - Country: JP
 - Percentage: 50%

Territorial RightsController Information in ERN-3

```
<SoundRecordingDetailsByTerritory>
  <TerritoryCode>FR</TerritoryCode>
  <!-- ... -->
  <RightsController>
    <PartyName>
      <FullName>LeftRight</FullName>
    </PartyName>

    <RightSharePercentage>10</RightSharePercentage>
