Old Versions

▼ Old Versions of DDEX Standards

Here you can find the old version of DDEX Standards. **DDEX recommends to always implement the latest version** but sometimes users require access to an older version (e.g. for debugging or maintaining an implementation based on an older version, or even for planning to upgrade to the latest version). This page does not provide versions that have been withdrawn because of bugs.

All old versions are provided in the form of a zip archive that can be downloaded. The XSDs for all old standard remain valid and remain to be hosted on the DDEX website.
