

8.4 File Naming Convention

The file name of the `ManifestMessage` for each Batch shall be the string `BatchComplete_` followed by the `BatchId` (as defined above) and the `.xml` file extension. The same file name applies to the zero-byte semaphore file explained in [Clause 8.1](#).

The file name of the `FtpAcknowledgementMessage` for each Batch shall be the string `ACK_`, followed by the date and time that the Batch is placed on the ftp server, followed by an underscore and the `ReleaseId`. The file shall have an `.xml` file extension.

The shall be named using the same `ErnMessageId` as used for the enclosing folder with an `.xml` file extension.

To aid human intervention, each Resource file should be named as described in [Clause 7.3](#).
