

Digital Sales Reporting Message Suite Standard - Part 9: Profile for Financial Reporting to Record Companies

1 Introduction

This standard was developed by the member organisations of the Digital Data Exchange, LLC (DDEX) and provides a message suite with a number of Profiles that gives a uniform mechanism to enable Licensees (typically Digital Service Providers) to report to Rights Controllers (typically Music Rights Societies, Music Publishers, Music Licensing Companies and/or Record Companies) information regarding the level of usage and/or revenue generated from the distribution of such products, as well as sales of products based on Releases, to the relevant Rights Controllers.

Any organisation wishing to implement this (or any other DDEX standard) is required to apply for an Implementation Licence. The terms of the licence and an application form can be found on <https://ddex.net/implementation/implementation-licence-and-ddex-party-identifiers>.

2 Scope

2.1 Introduction

The message defined in this Part provides a mechanism for companies such as Digital Service Providers to report Usage, Revenue or Sales from the exploitation of Products based on electronic Releases containing such Sound Recordings and/or Music Audio-Visual Recordings, to Record Companies or other controllers of rights in Releases, Sound Recordings and Music Audio-Visual Recordings Usage.

2.2 Organisation of the Standard

This standard comprises five clauses and two annexes. Clauses 1-4 provide the scope, abbreviations and core definitions used in this standard. Clause 5 then defines the Profile.
